

ATTACHMENT E

ADOPTION OF MITIGATION MONITORING AND REPORTING PROGRAM

Pursuant to Public Resources Code § 21091.6(a)(1) and CEQA Guidelines § 15097, the County of Santa Clara Board of Supervisors adopts the Mitigation Monitoring and Reporting Program (MMRP) attached hereto as Exhibit 1. The MMRP provides for the implementation, monitoring, reporting, and enforcement of all mitigation measures adopted to reduce the significant environmental impacts of the County Recommended General Use Permit (GUP) Project.¹ The MMRP in Exhibit 1 has been updated from the MMRP presented to the Planning Commission in order to reflect the final mitigation measures in the Final Environmental Impact Report (EIR).

The mitigation measures in the MMRP that Stanford is required to implement have been made fully enforceable by being incorporated into the proposed Conditions of Approval for the County Recommended GUP Project. The elements of Transportation and Traffic Mitigation Measure 7A.15-2 from the Final EIR have been incorporated into proposed GUP Condition F. GUP Condition F, however, has different formatting and additional detail (e.g., definitions of various terms, clarification of methodologies to be used, and performance standards) designed to both enhance mitigation measure effectiveness and to reflect additional traffic conditions to be incorporated into the 2018 GUP to ensure that the Project complies with the requirement in County Zoning Ordinance § 5.65.030(D)(5) that the use “will not substantially worsen traffic congestion affecting the surrounding area.” For example, the EIR impacts and mitigation measures address commute direction and reverse-commute direction trips during the AM and PM peak *hours* (i.e., commute and reverse commute impacts). GUP Condition F also addresses average daily trips (ADT), and clarifies and strengthens the requirements related to conducting annual traffic counts and establishing trip credits.

Attachment—

Exhibit 1—Mitigation Monitoring and Reporting Program

¹ The County Recommended GUP Project includes the County Recommended General Use Permit consisting of up to 2,275,000 additional net new square feet of academic and academic support uses and up to 2,892 housing units and 2,807 beds, for a total of up to 5,699 net new housing units/beds; amendments to the Stanford University Community Plan; and, Zoning Ordinance Map amendments.

Exhibit 1

MITIGATION MONITORING AND REPORTING PROGRAM – COUNTY RECOMMENDED GUP PROJECT

Section 1: Authority

This Mitigation Monitoring and Reporting Program (MMRP) has been prepared pursuant to Section 21081.6 of the *California Environmental Quality Act*, known as CEQA (Public Resources Code Section 21000 et seq.), to provide for the monitoring of mitigation measures required for the County Recommended General Use Permit (GUP) Project, which includes the proposed Stanford University 2018 General Use Permit as modified by Additional Housing Alternative A, as described in the Final Environmental Impact Report (Final EIR) prepared for 2018 GUP. This MMRP, and the Final EIR, will be kept on file at the County of Santa Clara Planning Office, County Government Center, 70 West Hedding, 7th Floor, East Wing, San Jose, California.

As described in Section 15097 of the *CEQA Guidelines*, “[r]eporting generally consists of a written compliance review that is presented to a decision-making body or authorized staff person. A report may be required at various stages during project implementation or upon completion of the mitigation measure. ‘Monitoring’ is generally an ongoing or periodic process of project oversight.” This MMRP includes both reporting and monitoring elements, as appropriate for implementation of each mitigation measure.

Section 2: Content of MMRP Matrix

Exhibit 1 identifies the environmental impacts for which mitigation measures are identified; the required mitigation measures; the timeframe for implementing, monitoring, and reporting on these measures; the responsible monitoring and reporting parties; and monitoring actions and schedule, actions needed to verify compliance.

Section 3: Implementation and Enforcement of Measures

This MMRP includes all mitigation measures that are applicable to the County Recommended GUP. The intent of the MMRP is to ensure the effective implementation and enforcement of adopted mitigation measures. As discussed in the Final EIR, the mitigation measures included in the MMRP are measures required to avoid or lessen significant impacts of the project.

The MMRP matrix identifies the mitigation schedule and the parties responsible for implementing, monitoring and reporting on the implementation of the measures listed in Table A. As the CEQA lead agency for the Project, the County is principally responsible for MMRP monitoring and enforcement. In addition, as provided in CEQA Guidelines Section 15097(a), the County may delegate MMRP monitoring responsibilities to other public agencies, either working with other local governments through their permitting or regulatory authorities, or through memoranda of understanding that the County enters into with other entities.

IMPORTANT REQUIREMENT:

Approved Consultants. Where Stanford is required by the Conditions of Approval and the Mitigation Monitoring and Reporting Program to retain a qualified consulting expert approved by the County, Stanford shall submit a request to the County for approval. The request should identify the consultant, describe the work to be completed and the anticipated timeframe, and include the consultant’s qualifications to complete the specified task. Stanford may retain the consultant only upon written approval of the request by the Director of Planning and Development.

EXHIBIT 1¹
MITIGATION MONITORING & REPORTING PROGRAM

Mitigation Measures	Mitigation Responsibility	Mitigation Schedule	Monitoring and Reporting Program Responsibility	Monitoring Actions/Schedule and Verification of Compliance
Visual and Scenic Resources				
<p>Mitigation Measure 7A.1-4: Stanford shall submit a lighting plan for approval by the County Planning Office <u>Director</u>, as part of an <u>Architecture and Site Approval (ASA)</u> review, for each development project that would include exterior light sources. The plan shall show the extent of illumination that would be projected from proposed outdoor lighting. State-of-the-art luminaires shall be used where necessary, with high beam efficiency, sharp cut-off, and glare and spill control. Upward glow shall not be allowed in residential or academic uses.</p>	Stanford	During project design/review of development project	County of Santa Clara	Include in MMRP Report; Complete upon approval of lighting plan
Air Quality				
<p>Mitigation Measure 7A.2-2: Best Management Practices for Controlling Particulate Emissions. Stanford shall require all construction contractors to implement the following measures:</p> <ul style="list-style-type: none"> • All exposed surfaces (e.g. parking areas, staging areas, soil piles, graded areas, and unpaved access roads) shall be watered two times per day; • All haul trucks transporting soil, sand or other loose material off-site shall be covered; • All visible mud or dirt track-out onto adjacent public roads shall be removed using wet power vacuum street sweepers at least once per day. The use of dry power sweepers is prohibited; • All vehicle speeds on unpaved roads shall be limited to 15 mph; • All roadways, driveways, and sidewalks to be paved shall be completed as soon as possible. Building pads shall be laid as soon as possible after grading unless seeding or soil binders are used; • Idling times shall be minimized either by shutting equipment off when not in use or reducing the maximum idling time to 5 minutes. Clear signage shall be provided for construction workers at all access points; • All construction equipment shall be maintained and properly tuned in accordance with manufacturers' specifications. All equipment shall be checked by a certified visible emissions evaluator; and 	Stanford	During construction of development project	County of Santa Clara	Include in MMRP Report; Complete upon completion of construction of development project

¹ Consistent with the Conditions of Approval, strikeouts show deletions to words and phrases in the mitigation measures as published in the Environmental Impact Report and underlines show additions.

EXHIBIT 1¹
MITIGATION MONITORING & REPORTING PROGRAM

Mitigation Measures	Mitigation Responsibility	Mitigation Schedule	Monitoring and Reporting Program Responsibility	Monitoring Actions/Schedule and Verification of Compliance
<ul style="list-style-type: none"> Post a publicly visible sign with the telephone number and person to be contacted regarding dust complaints. This person shall respond and take corrective action within 48 hours. The Air District’s phone number shall also be visible to ensure compliance with applicable regulations. 				
Air Quality (cont.)				
<p>Mitigation Measure 7A.2-3(a): Health Risk Screening for Construction Projects. Prior to approval of an individual project, Stanford shall conduct a project-specific health risk screening using the screening distances presented in Table 7A.2-2 of the EIR and submit it to the County Planning Office Director for peer review and approval. If the individual project is located further from sensitive receptors than the minimum distance identified in Table 7A.2-2 of the EIR, then no further construction health risk assessment or additional mitigation is required. If the construction project is closer than the specified minimum distance, then a project-specific Health Risk Assessment shall be prepared, as outlined in Mitigation Measure 7A.2-3(b).</p>	Stanford	Prior to approval of development project	County of Santa Clara	Include in MMRP Report; Complete upon completion of health risk screening by Stanford and approval by the County
<p>Mitigation Measure 7A.2-3(b): Project-Specific Health Risk Analysis. If the screening criteria in Table 7A.2-2 of the EIR are not met, Stanford shall prepare and submit to the County Planning Office Director for peer review and approval a project-specific health risk analysis demonstrating that project construction activities will not result in a significant acute, chronic non-cancer or cancer-related health risk to sensitive receptors. As a performance standard, any subsequent project-specific health risk analysis must demonstrate an excess cancer risk level of 10-in-1 million or less, a non-cancer (i.e., chronic or acute) hazard index of 1.0 or less, and an incremental increase an annual average PM2.5 concentration of no more than 0.3 microgram per cubic meter.</p>	Stanford	Prior to approval of development project; if screening criteria if Mitigation Measure 5.2-3(a) is not met	County of Santa Clara	Include in MMRP Report; Complete upon completion of project-specific health risk analysis by Stanford and approval by the County
<p>Mitigation Measure 7A.2-5: Laboratory Fume Hood Emission Control. For any individual project that contains more than 25,000 square feet of emissions-generating laboratory space within a building and 50 fume hoods, Stanford shall conduct a health risk screening analysis and obtain a permit from the BAAQMD for the proposed individual project; this permit may be required either prior to or as a condition of approval of the proposed individual project. In accordance with BAAQMD Rules 2-1 and 2-5, new sources of emissions must implement Best Available Control Technology for Toxic (T-BACT) if individual source risks exceed 1.0 in a million for cancer and/or chronic hazard index is greater than 0.20. Additionally, a permit will be denied if project cancer risk exceeds 10.0 in a million or if the chronic or acute hazard index exceeds 1.0. Compliance with BAAQMD rules will ensure that new laboratory operations will not result in a significant health risk impact.</p>	Stanford	Prior to approval of development project	County of Santa Clara, BAAQMD	Include in MMRP Report; Complete upon completion of health risk screening analysis and issuance of permit from the BAAQMD

EXHIBIT 1¹
MITIGATION MONITORING & REPORTING PROGRAM

Mitigation Measures	Mitigation Responsibility	Mitigation Schedule	Monitoring and Reporting Program Responsibility	Monitoring Actions/Schedule and Verification of Compliance
Biological Resources				
<p>Mitigation Measure 7A.3-1(a): <i>Avoid tree removal and commencement of outdoor construction activities during nesting season.</i> Tree removal or pruning associated with project construction and commencement of outdoor project construction activities shall be avoided from February 1 through August 31, the primary local bird nesting season, to the extent feasible. If no tree removal or pruning associated with project construction is proposed during the nesting period and outdoor project construction activities will commence outside the nesting period, no surveys for active bird nests are required.</p> <p>Or</p> <p><u>If Stanford proposes to initiate construction during the February 1 to August 31 nesting season, it shall notify the County.</u></p>	Stanford	Outdoor construction occurring between September 1 and January 31	County of Santa Clara	Include in MMRP Report; Complete upon tree removal and outdoor construction activities outside of nesting season
<p>Mitigation Measure 7A.3-1(b): <i>Survey for active bird nests within 250 feet of construction sites.</i> If the County Planning Office Director determines that compliance with Mitigation Measure 5.3-1(a) is not feasible because the timing of a construction project necessitates construction-related tree removal/pruning during the nesting season and/or commencement of outdoor construction activities during the nesting season, within seven days prior to the proposed start of construction activities an independent, qualified biologist approved by the County shall conduct a nesting bird survey of all potential habitat at the construction site and within 250 feet of the perimeter of the construction site. The survey results shall be provided to the County Planning Office Director prior to issuance of site demolition, grading or building permits.</p>	Stanford (using biologist approved by County)	<p><i>MM 7A.3-1b to 7A.3-1(e): Outdoor construction occurring between February 1 and August 31.</i></p> <p>Survey within seven days prior to construction; submit survey results prior to issuance of site demolition, grading or building permits</p>	County of Santa Clara	Include in MMRP Report; Complete upon completion of nesting bird survey and County of Santa Clara receipt of survey results
<p>Mitigation Measure 7A.3-1(c): <i>Minimize impacts to active bird nests.</i> If any active nests are detected during the pre-construction survey, an independent, qualified biologist approved by the County shall recommend a work-exclusion buffer zone that shall be designated around the active nest to allow for both the successful fledging of the birds and initiation of work on some portions of the project site. The work-exclusion zone(s) shall be reviewed and approved by the County Planning Office Director prior to commencement of construction. A qualified biologist shall monitor any occupied nest located within a protective buffer zone in order to determine if the designated buffer zone is effective and when the buffer zone is no longer needed. If the buffer zone is determined to be ineffective, its size shall be increased until it is effective, or work shall cease until the young have fledged and are independent of the nest.</p>	Stanford (using biologist approved by County)	Prior to commencement of construction, identify work-exclusion zone(s). During construction, monitor within buffer zone	County of Santa Clara	Include in MMRP Report; Complete upon approval of work-exclusion zone(s) by County of Santa Clara

EXHIBIT 1¹
MITIGATION MONITORING & REPORTING PROGRAM

Mitigation Measures	Mitigation Responsibility	Mitigation Schedule	Monitoring and Reporting Program Responsibility	Monitoring Actions/Schedule and Verification of Compliance
<p>Mitigation Measure 7A.3-1(d): <i>Delay activity.</i> If no sufficient work-exclusion zone(s) are possible, then there shall be a delay in the start of construction until the active nest is no longer occupied. A qualified biologist <u>approved by the County</u> shall monitor any occupied nest to determine when the nest is no longer used.</p>	Stanford (using biologist approved by County)	Prior to construction	County of Santa Clara	Include in MMRP Report; Complete upon verification that nest is no longer used and County of Santa Clara receipt of supporting documentation
Biological Resources (cont.)				
<p>Mitigation Measure 7A.3-1(e): <i>Remove nest starts.</i> A qualified biologist <u>approved by the County</u> can visit project sites at any time prior to tree removal or the initiation of outdoor construction work in order to find and remove nest starts. <u>Nest starts are defined as nests</u> which do not have eggs or nestlings present. This activity will minimize impacts to birds as they will generally move elsewhere and restart their nest building process.</p>	Stanford (using biologist approved by County)	Remove nests prior to tree removal or outdoor construction work	County of Santa Clara	Include in MMRP Report; Complete upon nest removal and County receipt of supporting documentation
<p>Mitigation Measure 7A.3-2(a): <i>Conduct pre-project survey.</i> Prior to project construction, an independent, qualified bat biologist approved by the County shall conduct a pre-construction survey for roosting bats in trees to be removed or pruned and structures to be demolished within the work area and within a 50-foot radius of the work area. The survey results shall be provided to the <u>County Planning Office Director</u> prior to issuance of site demolition, grading or building permits. If no roosting bats are found, no further action is required. If a bat roost is found, Stanford shall implement the following measures to avoid impacts on roosting bats.</p>	Stanford (using biologist approved by County)	Prior to construction; submit survey results prior to issuance of site demolition, grading or building permits	County of Santa Clara	Include in MMRP Report; Complete upon completion of roosting bat survey and County receipt of survey results
<p>Mitigation Measure 7A.3-2(b): <i>Evict non-maternal roosts.</i> <i>Evict non-maternal roosts.</i> If a non-maternal roost of bats is found in a tree or structure to be removed or demolished as part of project construction, the individuals shall be safely evicted, under the direction of a qualified bat biologist, by opening the roosting area to allow airflow through the cavity. Removal or demolition should occur no sooner than at least two nights after the initial minor site modification (to alter airflow). This action allows bats to leave during darkness, thus increasing their chance of finding new roosts with a minimum of disturbance. Departure of the bats from the construction area shall be confirmed with a follow-up survey by a qualified bat biologist prior to start of construction.</p>	Stanford (using biologist approved by County)	Prior to construction; submit follow-up survey results prior to construction	County of Santa Clara	Include in MMRP Report; Complete upon completion of eviction of non-maternal roosts and County receipt of supporting documentation
<p>Mitigation Measure 7A.3-2(c): <i>Avoid maternal roosting areas.</i> If active maternity roosts are found in trees or structures that will be removed or demolished as part of project construction, tree removal or demolition of that structure shall commence and be completed before maternity colonies form (generally before March 1) or shall not commence until after young are flying (generally after July 31). Active maternal roosts shall not be disturbed.</p>	Stanford (using biologist approved by County)	August 1 through February 28	County of Santa Clara	Include in MMRP Report; Complete upon tree removal or demolition in timing specified in measure

EXHIBIT 1¹
MITIGATION MONITORING & REPORTING PROGRAM

Mitigation Measures	Mitigation Responsibility	Mitigation Schedule	Monitoring and Reporting Program Responsibility	Monitoring Actions/Schedule and Verification of Compliance
<p>Mitigation Measure 7A.3-2(d): <i>Develop and employ bat nest box plan.</i> If special-status bats are found in trees or structures to be removed or demolished as part of project construction, Stanford shall develop and implement a Bat Nest Box Plan for the Stanford campus employing current bat nest box technology. The design and placement of nest boxes shall be reviewed <u>and approved</u> by an independent, qualified bat biologist <u>approved by the County</u>, and shall be consistent with Stanford's anticipated long-term planning and development activities.</p>	Stanford (using biologist approved by County)	Prior to construction; prepare Bat Nest Box Plan. During construction implement Bat Nest Box Plan	County of Santa Clara	Include in MMRP Report; Complete upon completion of plan and approval by the County
Biological Resources (cont.)				
<p>Mitigation Measure 7A.3-3(a): <i>Surveys.</i> Prior to any clearing of vegetation within the Lathrop Development District, Lagunita and adjacent uplands (see Figure 5 of the Conditions), jurisdictional waterways/wetlands, or lands on the Project site outside the Academic Growth Boundary, an independent, qualified biologist approved by the County shall conduct a survey for San Francisco dusky-footed woodrat nests within the project area. The survey results shall be provided to the <u>County Planning Office Director for approval</u> prior to issuance of site demolition, grading or building permits.</p>	Stanford (using biologist approved by County)	Prior to vegetation clearing; submit survey results prior to issuance of site demolition, grading or building permits	County of Santa Clara	Include in MMRP Report; Complete upon completion of survey and County receipt of survey results
<p>Mitigation Measure 7A.3-3(b): <i>Avoidance.</i> Where feasible, an exclusion buffer of at least 10 feet from these nests shall be established and clearly demarcated to avoid moving or bumping the nests or the logs or branches on which the nests rest.</p>	Stanford (using biologist approved by County)	Establish exclusion buffer prior to and during construction	County of Santa Clara	Include in MMRP Report; Complete upon establishing exclusion buffer and County receipt of supporting documentation
<p>Mitigation Measure 7A.3-3(c): <i>Mitigation.</i> If establishing a buffer and avoiding the nests is not feasible, the nests shall be dismantled and the nesting material moved to a new location outside the project's impact areas so that it can be used by woodrats to construct new nests. Prior to nest deconstruction, each active nest shall be disturbed by a qualified wildlife biologist <u>approved by the County</u>, to the degree that all woodrats leave the nest and seek cover out of the impact area. Whether the nest is on the ground or in a tree, the nest shall be slightly disturbed (nudged) to cause the woodrats to flee. For tree nests, a tarp shall be placed below the nest and the nest dismantled using hand tools (either from the ground or from a lift). The nest material shall then be piled at the base of a nearby tree or large shrub outside of the impact area.</p>	Stanford (using biologist approved by County)	Prior to construction	County of Santa Clara	Include in MMRP Report; Complete upon relocating nests and County receipt of supporting documentation
<p>Mitigation Measure 7A.3-4(a): <i>Surveys.</i> If construction is proposed within any jurisdictional waterways/wetland areas, Lagunita basin and adjacent uplands (see Figure 5 of the Conditions), the Lathrop Development District, or Project site lands outside the Academic Growth Boundary, an independent, qualified biologist approved by the County shall conduct a focused survey for special-status plant species prior to ground disturbance during the late winter/early spring period when most local native plant species are flowering</p>	Stanford (using biologist approved by County)	Prior to ground disturbance; submit survey results prior to issuance of site demolition, grading or building permits	County of Santa Clara, CDFW	Include in MMRP Report; Complete upon completion of focused special-status plant species survey and County receipt of survey results

EXHIBIT 1¹
MITIGATION MONITORING & REPORTING PROGRAM

Mitigation Measures	Mitigation Responsibility	Mitigation Schedule	Monitoring and Reporting Program Responsibility	Monitoring Actions/Schedule and Verification of Compliance
<p>and most easily identified. The survey results shall be provided to the County Planning Office Director prior to issuance of site demolition, grading or building permits. If special status plant surveying during flowering period is not possible, development within sensitive habitat areas shall be avoided unless approved by California Department of Fish and Wildlife (CDFW) and the County Planning Office Director.</p>				
Biological Resources (cont.)				
<p>Mitigation Measure 7A.3-4(b): Avoidance. Construction activities shall avoid impacts to special-status plant species by establishing a buffer zone around the individuals in question. The buffer size shall be determined by an independent, qualified biologist approved by the County in order to avoid potential disturbance. The width of the buffer shall depend on a consideration of site-specific characteristics, including the plant's ecological requirements (e.g., sunlight, moisture, shade tolerance, soils, physical and chemical characteristics) and adjacent uses (e.g., sprinkler irrigation or shading from buildings or other structures). The buffer zone shall be clearly demarcated using exclusion fencing.</p>	Stanford (using biologist approved by County)	Establish buffer zone prior to construction; avoid during construction	County of Santa Clara	Include in MMRP Report; Complete upon establishing buffer zone and County receipt of survey results
<p>Mitigation Measure 7A.3-4(c): Mitigation if avoidance is not feasible. If the County Planning Office Director determines that establishing an avoidance buffer is not feasible, individual plants (including seeds) shall be transplanted to an area with suitable physical and biological conditions on the Project site outside of the Academic Growth Boundary and monitored and adaptively managed for five years. Transplantation may be accomplished by relocating individual plants or through seed collection and dispersal, or a combination of both, to be determined based on the species. <u>Prior to construction within any area containing special-status plant species, Stanford shall submit a mitigation plan to the satisfaction of the Director identifying planting methods, performance standards, and monitoring periods and protocols.</u></p>	Stanford (using biologist approved by County)	Transplant prior to construction; Monitoring for five years	County of Santa Clara	Include in MMRP Report; Complete upon five years of monitoring and adaptive management
<p>Mitigation Measure 7A.3-6(a): Habitat avoidance. Grading or ground-disturbing activities within 150 feet of the top of bank of a creek that supports steelhead shall be avoided. <u>The EIR indicates that the steelhead are present in the San Francisquito Creek system.</u></p>	Stanford	Avoid during construction	County of Santa Clara	Include in MMRP Report; Complete upon completion of construction
<p>Mitigation Measure 7A.3-6(b): Protective measures. If the County Planning Office Director determines that avoidance of steelhead habitat is not feasible, Stanford shall obtain any required permits and approvals from federal and state wildlife agencies, <u>as determined by the U.S. Fish and Wildlife Service and the California Department of Fish and Wildlife, as well as including a Streambed Alteration Agreement.</u> Such permits and approvals shall specify the conditions under which construction activities may occur, including any applicable construction windows, installation of coffer dams or other measures necessary to protect steelhead. <u>Permits and approvals from wildlife agencies (or documentation that permits are not required) shall be</u></p>	Stanford	Obtain permits and approvals prior to construction	County of Santa Clara, Corps, USFWS, NMFS, CDFW	Include in MMRP Report; Complete upon completion of construction in accordance with permits and approvals

<u>submitted to the satisfaction of the Director prior to issuance of any construction permits.</u>				
Mitigation Measure 7A.3-7(a): Grading or ground-disturbing activities within 150 feet of riparian habitat shall be avoided.	Stanford	During construction	County of Santa Clara	Include in MMRP Report; Complete upon completion of construction
Biological Resources (cont.)				
Mitigation Measure 7A.3-7(b): If the County Planning Office Director determines that avoidance is not feasible, Stanford shall obtain all appropriate permits for wetland or other work within the riparian area from the <u>Army Corps of Engineers Corps, US Fish and Wildlife Service FWS, National Oceanic and Atmospheric Administration MFS and California Department of Fish and Wildlife DFW.</u> As specified by agency permits, any riparian habitat areas lost as a result of project development would be replaced through the creation, preservation or restoration of equivalent habitat at an appropriate mitigation ratio or through other measures that the <u>as approved by the wildlife regulatory agencies listed above.</u> deem appropriate and approve in order to adequately mitigate the impact.	Stanford	Obtain permits and approvals prior to construction	County of Santa Clara, Corps, USFWS, NMFS, CDFW	Include in MMRP Report; Complete upon completion of construction in accordance with permits and approvals
Mitigation Measure 7A.3-8(a): Prior to oak tree removal within the Lathrop Development District, a tree removal plan and arborist report shall be submitted which identifies the species type, acreage, diameter, and amount of canopy of oak trees proposed for removal. The arborist report shall be prepared by an I.S.A. Certified Arborist, Registered Professional Forester, or another professional approved by the County Planning Office.	Stanford (using I.S.A. Certified Arborist or Registered Professional Forester or County-approved professional)	Prior to oak tree removal; prepare tree removal plan and arborist report	County of Santa Clara	Include in MMRP Report; Complete upon approval of tree removal plan and arborist report by the County
Mitigation Measure 7A.3-8(b): If the proposed oak tree removal would result in a decrease of 0.5-acre or more of native oak canopy on the project site, at least two of the following three mitigation measures shall be implemented:	Stanford	Prior to oak tree removal	County of Santa Clara	Include in MMRP Report; As specified in the measure

EXHIBIT 1¹
MITIGATION MONITORING & REPORTING PROGRAM

Mitigation Measures	Mitigation Responsibility	Mitigation Schedule	Monitoring and Reporting Program Responsibility	Monitoring Actions/Schedule and Verification of Compliance
<p>1) <i>Planting Replacement of Oak Trees.</i> Pursuant to Public Resources Code Section 21083.4, the planting of oaks shall not fulfill more than 50 percent of the mitigation requirement for the project.</p> <p>Tree replacement can be dependent upon the size of the canopy of the removed trees, the number of trees to be removed, the size of trees to be removed, the type of trees to be removed, the steepness of the slope on which trees will be removed, or the amount of room on a parcel in which trees can be planted. The objective of tree planting shall be to restore former oak woodland at a ratio of 2:1 or 3:1 based on the condition of the oak woodland habitat. 2:1 restoration is recommended for medium quality oak woodland habitat, and 3:1 restoration is recommended for high quality oak woodland habitat.</p> <p>The following standard mitigation ratios shall be used, unless a <u>different higher</u> ratio is applied by the <u>Planning Office Director</u> based on site-specific characteristics:</p> <ul style="list-style-type: none"> • For the removal of one small tree (5-18 inches): two 24-inch boxed trees or three 15 gallon trees. • For the removal of 1 medium tree (18-24 inches): three 24-inch boxed trees or four 15 gallon trees. 				
Biological Resources (cont.)				
<ul style="list-style-type: none"> • For the removal of a tree larger than 24 inches: four 24-inch boxed trees or five 15 gallon trees. <p>All tree replacement shall be with in-kind species, unless alternate species are approved by the <u>Ccounty</u>. A Tree Planting and Maintenance Plan shall be submitted <u>for approval by the Director</u> showing species, size, spacing and location of plantings and the location and species of established vegetation. Tree plantings shall be monitored for five years following planting and a survival rate of 75% will be required. Should the planted trees fail to meet the established performance and survival criteria, Stanford shall be responsible for additional plantings and management activities necessary to ensure the long-term success of planted mitigation trees. <u>Additional tree plantings necessary to achieve the required survival rate shall be subject to a five-year monitoring period from the date of planting.</u></p> <p>2) <i>Conservation Easement.</i> Protect existing native oak trees on or off the project site from future development through a conservation easement or fee title dedication to the County or a land conservation group approved by the County.</p>	Stanford	Prior to oak tree removal	County of Santa Clara	Include in MMRP Report; As specified in the measure

EXHIBIT 1¹
MITIGATION MONITORING & REPORTING PROGRAM

Mitigation Measures	Mitigation Responsibility	Mitigation Schedule	Monitoring and Reporting Program Responsibility	Monitoring Actions/Schedule and Verification of Compliance
<p>Oak woodland offered as mitigation must be configured in such a manner as to best preserve the integrity of the oak ecosystem and minimize the ratio of edge to area. Priority should be given to conserving oak habitat adjacent to existing woodlands under conservation easements, public lands or open space lands. The protection of existing oak woodlands through conservation easements shall mitigate for the loss of oaks at a ratio equal to 2:1 (for medium quality oak woodland habitat) or 3:1 (for high quality oak woodland habitat) as determined by the County Planning Office Director. Land proposed as mitigation, when viewed with adjacent protected conservation land, should not result in conserved parcels of less than one acre.</p> <p>3) <i>Other Options</i>. If the County Planning Office Director determines that there are no feasible sites for oak woodland mitigation on Stanford lands, then Stanford shall submit a plan for review and approval by the County Planning Office Director that provides for the conservation of oak woodlands elsewhere in Santa Clara County in the same manner as 7A.3-8(b)(2).</p> <p>This plan must include protection of an existing oak ecosystem through a conservation easement or fee title dedication to the County or other local agency or organization responsible for the oak woodlands preservation.</p>				
Biological Resources (cont.)				
<p>Mitigation Measure 7A.3-9(a): <i>Jurisdictional waters and wetland identification.</i> Stanford has provided a wetland delineation that covers the lands within the Academic Growth Boundary. Prior to grading or ground-disturbing activities on lands outside the Academic Growth Boundary, the County shall determine whether the existing wetland delineation is adequate to assess the project’s impacts and, if not, an independent, qualified wetland biologist approved by the County shall delineate jurisdictional waters or wetlands on and within 250 feet of the construction site.</p>	Stanford (using qualified wetland biologist)	Prior to ground disturbance outside Academic Growth Boundary	County of Santa Clara	Include in MMRP Report; Complete upon completion of delineation
<p>Mitigation Measure 7A.3-9(b): <i>Jurisdictional waters and wetlands avoidance.</i> For all projects grading, or ground-disturbing activities within 250 feet of jurisdictional waters or wetlands shall be avoided unless the County Planning Office Director determines that avoidance is not feasible.</p>	Stanford	During construction	County of Santa Clara	Include in MMRP Report; Complete upon completion of construction

EXHIBIT 1¹
MITIGATION MONITORING & REPORTING PROGRAM

Mitigation Measures	Mitigation Responsibility	Mitigation Schedule	Monitoring and Reporting Program Responsibility	Monitoring Actions/Schedule and Verification of Compliance
<p>Mitigation Measure 7A.3-9(c): Jurisdictional waters or wetland replacement. If the County Planning Office Director determines that avoidance of jurisdictional waters or wetlands is not feasible, Stanford shall obtain all applicable appropriate permits or approval for work in jurisdictional waters (i.e., Waters of the State or Waters of the U.S.), from applicable regulatory agencies, including but not necessarily limited to, the U.S. Army Corps of Engineers, San Francisco Bay Regional Water Quality Control Board, and California State Department of Fish and Wildlife and U.S. Fish and Wildlife Service. Any jurisdictional waters or wetlands that are filled as a result of project development shall be replaced through the creation, preservation or restoration of jurisdictional waters or wetlands or through other measures that the agencies deem appropriate through permit requirements to adequately mitigate the impact. <u>Permits and approvals (or documentation that permits are not required) shall be submitted for approval by the Director prior to the issuance of any construction permits.</u> Potential measures may include the following:</p> <ul style="list-style-type: none"> • For creek projects, remove hardscape features from the stream channel and stream banks. • Stabilize exposed slopes or streambanks immediately upon completion of construction activities. • To restore disturbed aquatic sites, a wetland mitigation and monitoring plan will be prepared that outlines the objectives to mitigate for construction impacts. At a minimum the plan will include thresholds of replanting success (e.g., 90 percent plant survival after one year, 80 percent second year, and 70 percent third year), monitoring requirements (e.g., at least once each year to confirm site stability, plant viability, and to schedule weeding, as needed), and shall specify resource agency reporting requirements. 	Stanford (using qualified wetland biologist)	Prior to, during, and after construction	County of Santa Clara, Corps, RWQCB	Include in MMRP Report; As specified in the measure
Biological Resources (cont.)				
<p>Mitigation Measure 7A.3-11(a): Tree Preservation and Removal Ordinance. Stanford shall comply with the County's Tree Preservation and Removal Ordinance (County Ordinance Code, Division C16). A "tree" is defined as a woody plant having a single trunk measuring at least 37.7 inches in circumference (12 inches or more in diameter) measured at 4.5 feet above the ground or immediately below the lowest branch, whichever is lower, or in the case of multi-trunk trees, a trunk size of 75.4 inches in circumference (24 inches in diameter). <u>A protected tree on the Stanford Campus is a: Any trees in the Community Plan Area, not including the R1S zoning district (see Figure 4 of the Conditions), that meet the definition of a tree are required to be maintained by the conditions of approval of the GUP, and therefore are</u></p>	Stanford	Prior to construction	County of Santa Clara	Include in MMRP Report

<p><u>considered protected trees. In addition, the County Ordinance Code defines a protected tree on the Stanford campus as a:</u></p> <ul style="list-style-type: none"> • heritage tree (if included on the County's heritage resource inventory adopted by resolution of the Board of Supervisors); • a tree planted or retained as required by conditions of approval of County permits; • and a tree located within County rights-of-way and easements. <p>Stanford shall not remove a protected tree unless:</p> <ol style="list-style-type: none"> 1. Removal of the protected tree is authorized by a County land use approval for which a grading or building permit has been issued; 2. Removal of the protected tree is authorized by a County-issued administrative permit or encroachment permit for tree removal; or 3. Removal of the protected tree is exempt. In addition to trees removed pursuant to a County land use approval, the ordinance currently exempts removal of a protected tree in the following circumstances: <ul style="list-style-type: none"> • the tree is diseased, dead, or dying or substantially damaged from natural causes; • tree cutting is needed to remove a hazard to life and personal property; and/or • maintenance work within public utility easements 				
Biological Resources (cont.)				
<p>Mitigation Measure 7A.3-11(b): <i>Tree Replacement</i>. Issuance of a <u>permit or approval from the County land use permit, administrative permit or encroachment permit</u> that authorizes removal of a protected tree shall be conditioned as follows:</p> <ol style="list-style-type: none"> 1. Protected trees shall be replaced at a ratio of 3:1 for oaks and 1:1 for other protected trees; or 2. Stanford may submit a Vegetation Management Plan for the entire campus to the <u>County Planning Office Director</u> for review and approval. This plan must provide for the same or greater level of tree protection as the measures described in Mitigation Measure 7A.3-11(b)(1). 3. <u>Compliance with the Vegetation Management Plan shall be assessed in the Annual Monitoring Report.</u> 	Stanford	Prior to issuance of land use permit, administrative permit, or encroachment permit	County of Santa Clara	Include in MMRP Report; As specified in the measure

archaeologist that meets the Secretary of Interior Professional Qualifications Standards in Archaeology (36 CFR 61).				
Cultural Resources (cont.)				
<p>Significant impacts from projects on prehistoric and historic archaeological resources shall be addressed as specified below:</p> <ol style="list-style-type: none"> 1. If a building project is proposed on a mapped archaeological site, a qualified archaeologist shall conduct a project-specific analysis to determine whether a significant impact would occur. If the site is determined to be eligible and <u>If there is a potentially significant impact that cannot be avoided,</u> an Archaeological Resources Treatment Plan shall be prepared and approved by the Director <u>County Planning Office</u> prior to the commencement of ground disturbing activities. If a Stanford archaeologist performs this work, the County may at its discretion require a peer review by an independent qualified archaeologist at Stanford's expense. Project-specific mitigation, if necessary, shall be identified in accordance with the provisions of Section 21083.2 of the Public Resources Code. 2. In the event that previously unidentified historic or prehistoric archaeological resources are discovered during construction, the contractor shall cease work in the immediate area and the County Planning Office <u>Director</u> and University Archaeologist shall be contacted immediately. The University Archaeologist shall provide and implement <u>shall prepare</u> a proposed Archaeological Resources Treatment Plan for approval by the Director. <u>At the discretion of the County Planning Director (or designated representative) an independent qualified archaeologist may be retained by the County at the expense of Stanford to assess the significance of the find and the adequacy of the proposed Archaeological Resources Treatment Plan. The Director may require consultation with the Native American Heritage Commission. Stanford shall implement the approved Treatment Plan to the satisfaction of the Director.</u> 3. Archaeological monitoring shall be conducted at any time construction-related ground-disturbing activities (greater than 12 inches in depth) are taking place within 100 feet of known archaeological resources. A technical report including the results of all monitoring activities shall be prepared once monitoring is completed in accordance with professional standards and submitted to the University Archaeologist. The archaeological monitoring shall be conducted or supervised by an individual meeting the Secretary of Interior Professional Qualifications Standards in Archaeology (36 CFR 61).

Cultural Resources (cont.)				
<p>Mitigation Measure 7A.4-2(b): <u>Human Skeletal Remains.</u> If human skeletal remains are encountered, Stanford is required by County Ordinance No. Section B6-18 of the County Ordinance Code to immediately notify the County Coroner. Work shall immediately stop within a 100-foot radius of the find. If the County Coroner determines that the remains are Native American, the coroner shall contact the California Native American Heritage Commission, pursuant to Health and Safety Code Section 7050.5(c), and the County Coordinator of Indian affairs. No further disturbance of the site may be made except as authorized by the County Coroner. If artifacts are found in association with the human skeletal remains no further disturbance of the artifacts may be made until authorized by the County Planning Office Director. It is the responsibility of Stanford to provide for reburial of the human skeletal remains and associated artifacts following completion of the required Native American consultation process described by Health and Safety Code section 7050.5 (c) and Public Resources Code Section 5097.98; Stanford shall file a State Record Form (DPR Series) documenting the reburial location with the California Historical Resources Information System and provide the location on the updated map provided for in Section 3 above.</p>	Stanford	Upon discovery, if applicable	County of Santa Clara	Include in MMRP Report; Complete upon notification to County Coroner, and, if applicable, California Native American Heritage Commission
<p>Mitigation Measure 7A.4-3: <u>Fossilized Shell or Bone.</u> In the event that If potentially significant fossilized shell or bone is uncovered during any earth-disturbing operation, contractors shall stop work within 100 feet of the find and notify the University Archaeologist and the County Building Inspector assigned to the project. The University Archaeologist shall visit the site and make recommendations for treatment of the find (including but not limited to consultation with a paleontologist and excavation, if warranted), which shall be sent to the County Building Inspection Office and the County Planning Office Director for review and approval. If a fossil find is confirmed, it will be recorded with the United States Geological Survey and curated in an appropriate repository.</p>	Stanford	Upon discovery, if applicable	County of Santa Clara	Include in MMRP Report; Complete upon notification to County and recommendations for treatment, and if applicable, United States Geological Survey
Hazards and Hazardous Materials				
<p>Mitigation Measure 7A.8-2(a): During construction within the Project site, any contractor shall cease any earthwork activities upon discovery of any suspect soils or groundwater (e.g., petroleum odor and/or discoloration) during construction. The contractor shall notify Stanford's Department of Environmental Health and Safety (EH&S) and the County of Santa Clara's Hazardous Materials Compliance Division (HMCD) of the Department of Environmental Health upon discovery of suspect soils or groundwater. EH&S <u>Stanford</u> will retain a qualified environmental firm to collect soil samples to confirm the level of contamination that may be present.</p>	Stanford	Upon discovery during construction, if applicable	Stanford's Department of EH&S; County of Santa Clara HMCD	Include in MMRP Report; Complete upon determining presence of contamination

EXHIBIT 1¹
MITIGATION MONITORING & REPORTING PROGRAM

MITIGATION MONITORING & REPORTING PROGRAM

Mitigation Measures	Mitigation Responsibility	Mitigation Schedule	Monitoring and Reporting Program Responsibility	Monitoring Actions/Schedule and Verification of Compliance
<p>Mitigation Measure 7A.11-1: <i>Construction Noise Control Measures and Noise Control Plan for Off-Site Receptors.</i> If construction would be within 150 feet of off-site sensitive receptors, Stanford shall employ noise attenuation measures to reduce the generation of construction noise to achieve a performance standard of 75 dBA at the affected property line of the nearest off-site single family residential receptor and 80 dBA at the affected property line of the nearest off-site multi-family residential receptor. These measures shall be described in a Noise Control Plan that shall be submitted for review and approval by the <u>County Planning Director and Development Department</u> prior to issuance of a building permit to ensure that construction noise is consistent with the standards set forth in the County Ordinance Code.</p> <p><u>If necessary to achieve the minimum performance standards stated above,</u> <u>a</u>Additional measures specified in the Noise Control Plan and implemented during project construction shall include, at a minimum, the following noise control strategies:</p> <ul style="list-style-type: none"> For construction within on a <u>within</u> the Project site that would be <u>within</u> 150 feet of sensitive receptors located within the City of Palo Alto, hours of construction activity shall be restricted to those established in the City of Palo Alto Noise Ordinance (i.e., between the hours of 8:00eight AM a.m. to 6:00six PM p.m. <u>8:00eight AM a.m. to 6:00six PM p.m.</u> Monday through Friday, and between 9:00 nine AM a.m. and 6:00six PM p.m. <u>9:00 nine AM a.m. and 6:00six PM p.m.</u> on Saturday). For construction within on a <u>within</u> the Project site that would be <u>within</u> 150 feet of sensitive receptors located within all other residential areas, hours of construction activity shall be restricted to those established in the Santa Clara County Noise Ordinance (i.e., between seven a.m. and seven p.m., Monday through Saturday). Equipment and trucks used for construction shall use the best available noise control techniques (e.g., improved mufflers, equipment redesign, use of intake silencers, ducts, engine enclosures, and acoustically attenuating shields or shrouds). At a minimum, the Noise Control Plan shall require use of moveable noise screens, noise blankets, or other suitable sound attenuation devices be used to reduce noise levels to below 75 dBA; Impact tools (e.g., jack hammers, pavement breakers, and rock drills) used for construction shall be hydraulically or electrically powered wherever possible to avoid noise associated with compressed air exhaust from pneumatically powered tools. Where use of pneumatic tools is unavoidable, an exhaust muffler on the compressed air exhaust shall be used; this muffler can lower noise levels from the exhaust by up to approximately 10 dBA. External jackets on the tools themselves shall be used where feasible; this could achieve a reduction of 5 dBA. Quieter procedures, such as use of drills rather than impact tools, shall be used where feasible; and 	<p>Stanford</p>	<p>Submit Noise Control Plan prior to issuance of building permit for development project; Implement during construction</p>	<p>County of Santa Clara</p>	<p>Include in MMRP Report; Complete upon completion of construction of development project</p>

Noise and Vibration (cont.)				
<ul style="list-style-type: none"> The project shall not cause the Ldn to increase by 3.0 dB or more in an existing residential area, thereby causing the Ldn in the area to exceed 60 dB; The project shall not cause an increase of 3.0 dB or more in an existing residential area where the Ldn currently exceeds 60 dB. <p>Noise levels from the periodic testing of emergency generators within 150 feet of sensitive receptors in the cities of Palo Alto or Menlo Park also shall be minimized by proper siting and through installation of acoustical shielding. Scheduled testing of an emergency generator must not occur before 7:00 <u>AM</u> a.m. or after 7:00 <u>PM</u> p.m.</p>				
Recreation				
<p>Mitigation Measure 7A.14-1(a). Prior to occupancy of net new on-campus housing units/beds exceeding 4,425, Stanford shall provide to the City of Palo Alto a one-time contribution equivalent to the capital budget needs to provide for one-time turf replacement at Heritage Park. The amount of the contribution shall be determined by the County of Santa Clara based on an estimate from an independent contractor. The payment shall not be used for any purpose other than turf replacement at Heritage Park.</p> <p>Prior to occupancy of net new on-campus housing units/beds exceeding 3,150, Stanford shall provide to the City of Palo Alto a one-time contribution equivalent to the capital budget needs to provide for one-time turf replacement at neighborhood parks in College Terrace (Cameron, Mayfield, Weisshaar, and Werry Parks). The amount of the contribution shall be determined by the County of Santa Clara based on an estimate from an independent contractor. The payment shall not be used for any purpose other than turf replacement at College Terrace parks.</p> <p>Mitigation Measure 7A.14-1(b). Prior to occupancy of net new on-campus housing units/beds exceeding 4,425, Stanford shall provide to the City of Menlo Park a one-time contribution equivalent to the capital budget needs to provide for one-time turf replacement at Stanford Hills Park. The amount of the contribution shall be determined by the County of Santa Clara based on an estimate from an independent contractor. The payment shall not be used for any purpose other than turf replacement at Stanford Hills Park.</p>	Stanford	Prior to occupancy	County of Santa Clara	Include in MMRP Report

MITIGATION MONITORING & REPORTING PROGRAM

Mitigation Measures	Mitigation Responsibility	Mitigation Schedule	Monitoring and Reporting Program Responsibility	Monitoring Actions/Schedule and Verification of Compliance
<p>Mitigation Measure 7A.15-1: Construction Traffic Control Measures. The following traffic control measures are required to address impacts from construction of individual General Use Permit projects. <u>All of these items shall be included under Condition G.</u></p> <ul style="list-style-type: none"> • Protection and Maintenance of Public Transit Access and Routes. Stanford and its contractors shall be prohibited from limiting access to public transit, and from limiting movement of public transit vehicles, during project construction without prior approval from the VTA (<u>Santa Clara Valley Transportation Authority</u>) and other affected jurisdictions. Such approvals shall require submittal of <u>improvement plans</u> and advance coordination per VTA's Bus Stop Relocation Policy of a mitigation plan to reduce transit impacts to a less than significant level. Potential actions that would impact access to transit include, but are not limited to, relocating or removing public transit bus stops, limiting access to public transit bus stops or transfer facilities, or otherwise restricting or constraining public transit operations. • Maintenance of Pedestrian Access. Stanford and its contractors shall be prohibited from substantially limiting pedestrian access to properties or facilities during construction of the project, without prior approval from the affected jurisdictions. Such approvals shall require submittal and approval of specific construction management plans to mitigate the specific impacts to a less than significant level. Actions substantially limiting pedestrian access include, but are not limited to, sidewalk closures, bridge closures, crosswalk closures, pedestrian re-routing at intersections, placement of construction-related material within pedestrian pathways or sidewalks, and other actions which may affect the mobility or safety of pedestrians. If sidewalks are maintained along the construction site frontage, covered walkways shall be provided if determined by the County to be needed for pedestrian safety. • Maintenance of Bicycle Access. Stanford and its contractors shall be prohibited from substantially limiting bicycle access to properties or facilities during construction of the project, without prior approval from those jurisdictions. Such approval shall require submittal and approval of specific construction management plans to mitigate the specific impacts to a less than significant level. Actions substantially limiting bicycle access include, but are not limited to, bike lane closures or narrowing, closing or narrowing of streets that are designated bike routes, bridge closures, placement of construction-related materials within designated bike lanes or along bike routes, and other actions that may affect the mobility or safety of bicyclists. • Protection and Maintenance of Emergency Service Access and Routes. Stanford shall <u>indicate on plan submittals during the building permit plan check process</u>, inform the Stanford Police and Palo Alto Police and Fire Departments of construction locations, and shall designate alternate evacuation and emergency routes to maintain response times during construction periods 	<p>Stanford</p>	<p>During construction of development project</p>	<p>County of Santa Clara</p>	<p>Include in MMRP Report; Complete upon completion of construction of development project and as specified in the measure</p>

<ul style="list-style-type: none"> • Parking for Construction-Related Vehicles. Stanford shall provide adequate on-campus parking for all construction-related vehicles throughout the construction period. If adequate parking cannot be provided on the Stanford campus, a satellite parking area shall be designated, and a shuttle bus shall be operated to transfer construction workers to/from the job site. • Restriction on Construction Delivery Hours. Stanford shall make feasible attempts to avoid construction material deliveries from 7:00 AM to 9:00 AM and from 4:00 PM to 6:00 PM on weekdays. When feasible, Stanford shall be required to prohibit or limit the number of construction employees arriving or departing the site between 4:30 PM and 6:00 PM. • Construction Truck Routes. Stanford shall deliver and remove all construction-related equipment and materials on truck routes designated by the Cities of Palo Alto and Menlo Park and, in the event the County of San Mateo designates truck routes, by the County of San Mateo. Heavy construction vehicles shall be prohibited from accessing the site from routes that the Cities of Palo Alto, Menlo Park or County of San Mateo have prohibited for use by such vehicles. Stanford shall provide written notification to all contractors regarding appropriate routes to and from construction sites and the weight and speed limits for local roads used to access construction sites. A copy of all such written notifications shall be submitted to the <u>County Planning Office Director</u>. • Phone Number for Complaints. Stanford shall post at least one sign no smaller than 1,296 square inches (e.g. 3 ft. x 3 ft.) at all active construction sites. The sign shall contain the name, telephone number and e-mail address of the appropriate Stanford person <u>and the County Planning Department phone number, as determined by the Department</u> that the public may contact to report alleged violations of this mitigation measure or to register complaints about construction traffic associated with building projects under the 2048 General Use Permit. Stanford shall keep a written record of all such complaints and shall provide copies of these records to the <u>County Planning Office Director</u> as part of the annual report process. • Construction Impact Mitigation Plan. In lieu of the above mitigation measures, Stanford may submit a detailed construction impact mitigation plan to the County for review and approval <u>by the Director</u> prior to commencing any construction activities with potential transportation impacts. This plan shall address in detail the activities to be carried out in each construction phase, the potential transportation impacts of each activity, and an acceptable method of reducing or eliminating significant transportation impacts. If Stanford determines that it is not feasible to comply with the

MITIGATION MONITORING & REPORTING PROGRAM

Mitigation Measures	Mitigation Responsibility	Mitigation Schedule	Monitoring and Reporting Program Responsibility	Monitoring Actions/Schedule and Verification of Compliance
Transportation and Traffic (cont.)				
<p>“Restriction on Construction Delivery Hours” above, then the plan shall also explain the basis for this infeasibility determination. Details such as the routing and scheduling of materials deliveries, construction employee arrival and departure schedules, employee parking locations, and emergency vehicle access shall be described and <u>approved shall require approval by the Director.</u></p> <ul style="list-style-type: none"> • Construction During <i>Special Large Events</i>. Stanford shall prevent roadway construction activities from reducing roadway capacity during major athletic events or other <u>special large events</u> that attract a substantial number of visitors to the campus. This measure may require a special supplemental permit to be obtained to host such events during significant construction phases. 				
<p>Mitigation Measure 7A.15-2(a): Stanford shall mitigate the transportation impacts of its additional development and population growth either through a program of “no net new commute trips” or through the contribution of fair share fees for the improvements for adversely affected intersections specified in Table 1A [minus the contribution to these improvements provided pursuant to Mitigation Measure 7A.15-2(b), below], which funds shall be expended by the County to fund mitigation efforts.</p> <ol style="list-style-type: none"> 1. As specified on page 64 and Policy C-1 of the Stanford Community Plan, the no net new commute trips standard is defined as no increase in automobile trips during peak commute times in the peak commute direction, as counted at defined cordon locations around the central campus. The peak commute period is defined as the one-hour period in the morning (AM) and afternoon (PM) with the highest volume of traffic at the cordon locations, as determined by traffic counts. 2. The reasonable cost of all traffic counts and other work conducted for determination of compliance with this mitigation measure shall be paid for by Stanford. The counts shall be performed by an independent consultant under the direction of the <u>DirectorCounty Planning Office</u> or provided to the <u>DirectorCounty Planning Office</u> through another County approved methodology. 3. The baseline for measuring the no net new commute trips standard shall be the count that was established in 2001. However, during implementation of the 2018 General Use Permit, the County may modify, or approve Stanford-proposed modifications to the monitoring methodology on new technology such as automation, so long as the basic principles underlying the no net new commute 	Stanford	Ongoing	County of Santa Clara	Include in MMRP Report; Ongoing

EXHIBIT 1¹
MITIGATION MONITORING & REPORTING PROGRAM

Mitigation Measures	Mitigation Responsibility	Mitigation Schedule	Monitoring and Reporting Program Responsibility	Monitoring Actions/Schedule and Verification of Compliance
<p>trips standard are still met. If the monitoring methodology is updated, testing and calibration of the new methodology or equipment will require coordination with the County. The County may adjust the 2001 baseline as needed to reflect any such calibration. Monitoring counts shall be performed each year using the County-approved methodology.</p> <p>4. Traffic counts and determination of traffic volumes shall occur as described below, unless modifications are approved by the <u>Director County Planning Office</u>.</p> <p>a. Peak-hour traffic for a single year shall be determined through counts taken at two times during the year. All counts shall be conducted during the regular academic year, which does not include academic breaks or end-of-quarter finals. Homecoming or other irregular traffic patterns should be avoided. Specific dates for each count shall be determined by the <u>Director County Planning Office</u>. The two annual counts shall be averaged to determine the annual traffic level for each monitoring year.</p> <p>i. During monitoring periods, the total amount of traffic crossing the cordon line will be counted by travel direction. The cordon count monitoring will be conducted on a 24-hour basis. The morning (AM) and afternoon (PM) peak hours within the 24-hour count period will be calculated based on total volumes to determine the campus-wide peak hours.</p> <p>ii. All counts shall be taken at the campus entry and exit points shown in Figure 5.15-2, which together form the defined cordon line. Additional cordon gateways may be added or the location of the cordon line may be modified as determined by the County.</p> <p>a) Traffic counts shall include a methodology to determine the rate of cut-through traffic.</p> <p>1) Cut-through trips will be identified through license plates on each vehicle or other means. Entry and exit times will be noted to determine when a vehicle crosses the cordon in either direction.</p> <p>2) Matching license plates will be determined by comparing numbers that crossed both an entering and exiting cordon within a defined period (i.e., 20 minutes or as updated), or through other means. Vehicles that enter and exit the cordon within the time period will be cut-through trips</p>				

EXHIBIT 1¹
MITIGATION MONITORING & REPORTING PROGRAM

Mitigation Measures	Mitigation Responsibility	Mitigation Schedule	Monitoring and Reporting Program Responsibility	Monitoring Actions/Schedule and Verification of Compliance
<p>across the campus without a campus-related purpose. If data are available or it is feasible to measure, the County will include in the cordon counts all rideshare trips (e.g., Uber and Lyft) and other trips associated with drop-offs and pick-ups of people from locations within the cordon line that are not using public or Stanford-sponsored transit programs.</p> <p>b) Cordon volumes will be adjusted to account for use of parking lots within the cordon line by hospital-related traffic and use of lots outside the cordon line by campus-related traffic. Parking areas change due to the evolving needs of campus and hospital operations. The lots used for hospital and university parking shall be confirmed prior to annual surveys. The County reserves the right to change the methodology related to hospital parking or other parking factors in response to changing conditions.</p> <p>1) Hospital trips will be subtracted from the count and campus trips will be added to the count. The count adjustment will also factor in the potential for hospital trips to park in the campus lots and campus trips to park in the hospital lots. At the beginning and end of the peak hours, data will need to be collected from each lot. If campus parking occurs in lots outside the cordon, trips associated with those vehicles will be added back into the count. If hospital parking occurs inside the cordon, trips associated with those vehicles will be subtracted from the count. All vehicles without a parking permit will be assumed to be correctly parked in their respective lots, unless the County approves an alternate protocol for assigning such parking.</p> <p>c) Based on the 24-hour counts, the AM and PM peak hours will be identified for the campus. Peak hour traffic volume will be determined for the campus based on the count, adjusted for cut-through traffic and hospital parking as described above.</p> <p>1) Total entering and exiting traffic will be summed for the 16 campus gateways. A single AM and PM peak hour will be determined for the entire campus based on the peak inbound traffic in the AM period and the peak outbound traffic in the PM period. The percent of cutthrough trips calculated by the license plate matching (or other technology) described above will be</p>				

EXHIBIT 1¹
MITIGATION MONITORING & REPORTING PROGRAM

Mitigation Measures	Mitigation Responsibility	Mitigation Schedule	Monitoring and Reporting Program Responsibility	Monitoring Actions/Schedule and Verification of Compliance
<p>removed. With the exception of rideshare trips (e.g., Uber and Lyft) and other trips associated with drop-offs and pick-ups of people from locations within the cordon line that are not using public or Stanford-sponsored transit programs, the cut-through vehicles will be removed from both the inbound and the outbound traffic since they will have been observed crossing both an entering and exiting cordon boundary. Finally, the entering and exiting traffic for hospital uses inside the cordon boundary and the campus uses outside the cordon boundary calculated as described above will be subtracted from or added to the counts.</p> <p>5. As specified by Community Plan Policy C-8, the DirectorCounty Planning Office will recognize participation by Stanford in off-campus trip reduction efforts and credit those reduced trips towards Stanford’s attainment of the no net new commute trips standard. Stanford shall receive credit commensurate with the actual number of trips reduced outside the cordon due to Stanford’s direct efforts, or the proportion of the cost of the program to which Stanford is contributing. A reduction of an off-campus trip may be recognized as long as at least one terminus for the trip is within the area shown on Figure 7A.15-1 of the Final EIR. The DirectorCounty Planning Office will determine the appropriate trip credit and monitoring methodology for each program in which Stanford proposes to participate. Such proposals shall be submitted by Stanford to the DirectorCounty Planning Office for review, modification and potential approval. The proposals shall be presented to the Community Resource Group prior to any determination by the DirectorCounty Planning Office. Once the DirectorCounty Planning Office has accepted the proposal and the program implementation begins, the DirectorCounty Planning Office will identify, at Stanford’s cost, the number of trips reduced outside the cordon and calculate a trip reduction credit for application toward attainment of the no net new commute trips standard, with the continuing requirement that Stanford provide evidence of its participation in the ongoing program in a manner that can be independently verified. The County reserves the right to further regulate Project-generated trips and the use of trip credits through the Conditions of Approval for the General Use Permit.</p> <p>Funding of off-campus circulation infrastructure improvements may also qualify for trip credits if the improvements will enhance safety</p>				

EXHIBIT 1¹
MITIGATION MONITORING & REPORTING PROGRAM

Mitigation Measures	Mitigation Responsibility	Mitigation Schedule	Monitoring and Reporting Program Responsibility	Monitoring Actions/Schedule and Verification of Compliance
<p>or increase mobility for pedestrians, bicyclists or transit users within the local impact area, and thereby remove vehicular trips from the local impact area. For example, funding roadway widening or modifications to add transit vehicle or bicycle lanes or to add signals to improve pedestrian or bicycle safety could qualify for trip credits under this approach if approved by the County. Any proposal for such credits shall be accompanied by substantial evidence demonstrating that the infrastructure project would remove vehicular trips from the local impact area. Once the <u>DirectorCounty Planning Office</u> has approved infrastructure improvement project for a trip reduction credit, the project has been implemented, and the trip reductions have been verified, the trip reduction credit will be factored into the County's conclusion regarding Stanford's annual compliance with the no net new commute trips standard in each subsequent year. Each year, the County will report Stanford's trip credits in its annual monitoring report. The County will track and calculate trip reduction credits in a manner designed to ensure that credits benefit the three geographic sub-areas surrounding the Stanford campus (north, east, and south/southwest) in rough proportion to the 2018 General Use Permit trip assignment forecasted in the Draft EIR. Trip reduction credits with area-wide benefit will be tracked separately from trip reduction credits with sub-area geographic benefits.</p> <p>6. The <u>DirectorCounty Planning Office</u> shall monitor the cordon counts using the procedures described above. If the cordon counts, as modified by trip reduction credits, exceed the baseline volume by 1% or more for any two out of three consecutive years, mitigation of impacts to intersections in the form of fair share payments will be required, implementing Stanford Community Plan Implementation Recommendation C(i)(9). Table 1A identifies the intersection impacts that could occur if the no net new commute trips standard is not achieved, and the physical improvements that would substantially reduce each impact.</p> <p>Upon the County's determination that the no net new commute trips standard has been exceeded by 1% or more in two out of three consecutive years, the County will require Stanford to make its fair share contribution toward improvements at adversely affected intersections and roadways based on all exceedances of the "no net new commute trips" standards. The <u>DirectorCounty Planning Office</u> will use the intersection improvement fees collected from Stanford as follows:</p>				

EXHIBIT 1¹
MITIGATION MONITORING & REPORTING PROGRAM

Mitigation Measures	Mitigation Responsibility	Mitigation Schedule	Monitoring and Reporting Program Responsibility	Monitoring Actions/Schedule and Verification of Compliance
<p>a. The fees shall be used to fund the intersection improvements identified in Table 1A. The priority order for funding such intersection improvements will be determined by the DirectorCounty Planning Office in consultation with the affected jurisdictions. If the fees are used to fund an intersection improvement in another jurisdiction, the County will enter into an agreement with such jurisdiction to address the timing for the County to provide the funding, the timing for the relevant jurisdiction to complete the improvement, and any other matters that the County determines to be appropriate.</p> <p>b. Substitute Mitigation: If the DirectorCounty Planning Office determines that it is not feasible to use the fees for the specified intersection improvements (e.g., it does not appear that there will be full funding for the improvements within a reasonable time; the public agencies with authority or jurisdiction over the improvement projects will not approve the projects), then the fees may be used to fund off-campus projects that encourage and improve the use of alternative transportation modes or otherwise reduce peak period traffic in the local impact area, including but not limited to transit improvements that would directly or indirectly benefit the local impact area. This fund also could be used for transportation improvements that increase safety and mobility for pedestrians, bicyclists and transit users provided there is substantial evidence demonstrating how the improvements would remove vehicular trips from the local impact area.</p>				
Environmental Consequences of Stanford Providing Off-campus Housing under Proposed Project				
<p>Mitigation Measure 7A.17-1: Stanford shall demonstrate compliance with the California Environmental Quality Act (CEQA) for those projects that are located off campus and should mitigate the environmental impacts from the off-campus housing to the extent feasible.</p>	Affected jurisdictions	Ongoing	Affected jurisdictions	N/A
