Dear President Chavez and Supervisors,

Please vote to support the extension of the Academic Growth Boundary for 99 years with the 4/5 vote requirement.

The Stanford Foothills constitute some of the last grassland habitat on the Peninsula. Protecting this habitat is critical for wildlife.

Extending the supermajority vote requirement for 99 years does not mean that Stanford can never develop in the foothills, but merely requires a higher threshold for development approval. I ask that you afford this protection for our foothills open space.

Sincerely,

Hugh MacMillan

Dear President Chavez and Supervisors,

I wish to make my voice heard on the issue of the extension of the Academic Growth Boundary for 99 years with the 4/5 vote requirement.

While I agree that the Stanford Foothills constitute some of the last grassland habitat on the Peninsula. I also believe it is import to protect this habitat for wildlife at this time.

I do not agree with the 99 year extension term. The term should be no more than 10 years. In a ten year time span, many needs change. Conditions change. We cannot really see all that clearly beyond a 10 year horizon on very many issues. I see no harm in leaving ourselves and our future generations flexibility by not locking us into a 99 year condition. If in ten years the next group of citizens sees fit to extend the 4/5 vote requirement, then that is fine. But then it is their choice. And it is their opportunity to look at their current conditions and decide what is best for them.

Sincerely,

Craig L. Hirst
