MISSION STATEMENT:
The Older Adult Committee focuses on mental health and substance abuse issues for older individuals (60+). Committee members continued to advocate and express the need for older adult behavioral health services. There is a belief that older adults have distinct characteristics and needs different from other age groups and that funding and services for older adults needs to recognize these differences and provide services accordingly. Training is needed in older adult treatment and prevention and encourage collaboration with other older adult providers.

VISION STATEMENT: The Older Adult Committee’s Vision for a system of behavioral health for older adults is
   • A thriving older adult division of the Department of Behavioral Health, that delivers services from a foundation of evidence-based practices throughout the entire system of behavioral health care.
   • A system in which the professionals delivering services experience their work as “supportive” stimulating, rewarding and creative.
   • A system where older adults have access to culturally competent, effective and comprehensive treatment and service, where interventions are community oriented and occur at the earliest point of need.
