June 8, 2012

Kris Stadelman, Director
North Valley Workforce Board
505 West Olive Street, Suite 550
Sunnyvale, CA 94086

Dear Ms. Stadelman:

Congratulations to the North Valley Workforce Board (NOVA) for being awarded a Green Innovations Challenge Grant by the State of California. This demonstrates your continued commitment to using environmentally friendly renewable sources of electricity. On behalf of the Board of Supervisors, accept my sincere appreciation to NOVA for procuring two SunPod electrical vehicle charging systems.

These photovoltaic (PV) powered assemblies with PV panels, electrical chargers and inverters, battery storage, and framing and vehicle chargers will allow for credit card transactions to enable the vehicle charger. The County will allow NOVA as well as the International Brotherhood of Electrical Workers to make visits to the site located in two County garages for demonstration and training purposes.

Once again, thank you for your commitment to a green County of Santa Clara.

Sincerely,

George Shirakawa
President, Board of Supervisors
