4. Consider recommendations relating to the Office of the Registrar of Voters procurement process.

   a. Receive verbal report relating to the procurement process for voting systems.

      Taken out of order after Item No. 8.

      Matt Moreles, Assistant Registrar of Voters, reported that all implementation tasks are complete except for the refresher training which will be conducted closer to
election day. He further noted that all hardware has been received and that some parts did not pass inspection. Mr. Moreles advised of an issue with a custom-designed support transformer which will not be ready in time for the March 2020 election and noted that resolution efforts with the vendor are ongoing. He further advised of an add-on feature to the ballot readers that will print a serial number for easy ballot reference, however it will not be certified before the March 2020 election. Mr. Moreles advised of collaboration efforts with the State to assess the feasibility of conducting risk-limiting audits for the March 2020 election.

Mr. Moreles reported that proofing of ballots is currently underway, that the ballot artwork is expected to be delivered on schedule, and that logic and accuracy testing is scheduled to start on January 27, 2020. He further noted that poll worker training has begun and that election plans are on schedule.

Discussion ensued relating to poll worker training and the requirement that poll workers committed for all ten voting days are hired as County employees, due to stipend limitations.

**4.a RESULT:** RECEIVED

b. Receive verbal report relating to the procurement process for electronic polling books.

Mr. Moreles reported that the hardware is received, implementation items are complete, and that acceptance testing is currently underway. He further noted that the vendor is performing a customized configuration and that the polling books will be ready in time for the March 2020 election. Shannon Bushey, ROV, noted that the customized configuration will include an option on the screen for the voter to request a cross-over ballot.

**4.b RESULT:** RECEIVED

c. Receive verbal report relating to the procurement process for ballot on demand printing system.

Mr. Moreles reported that all units have been received and acceptance tested which will be used for training in the next week. He further noted that ballot data will be loaded into the units in late January 2020 and subsequently packaged for deployment.

**4.c RESULT:** RECEIVED

5. Receive report from the Office of the Registrar of Voters relating to State certification requirements for equipment to include detection and correction of single-event errors. (ID# 99831)

Mr. Moreles reported that he spoke with Susan Lapsley, Deputy Secretary of State, who stated that voting systems are tested for hardening against "bit flipping" errors and
directed him to the California Voting System Standards (CVSS) Section No. 4.4.6.1 which lists the various types of hardware testing conducted during voting system certification.

Commissioner Chessin commented that the list of testing does not include testing for protection against ionizing radiation causing "bit flips," and provided details relating to various levels of error correction protection. Mr. Moreles stated that he would clarify whether Commissioner Chessin could contact Ms. Lapsley directly to discuss possible additional language in the CVSS.

5 RESULT: RECEIVED

6. Receive report from Office of the Registrar of Voters relating to voter data including the number of registered voters per party preference in Santa Clara County.

Mr. Moreles reported that in response to voters reporting errors of no-party preference status, ROV efforts to determine the cause is underway, including analyzing voter registration data from the Department of Motor Vehicles (DMV). He further noted that the percentage of no-party preference voters steadily increases year over year, at a rate of less than one percent, however, between January 2018 to October 2018, which includes the time frame that the DMV began its new Motor Voter program, and the time that the DMV realized the party preference question was potentially unclear, the percentage of no-party preference registrations in Santa Clara County increased by approximately three percent; and, further advised that the two-percent increase difference is equal to approximately 16,000 voters. Finally, Mr. Moreles noted another potential reason for the influx of no-party preference registrations from the DMV, due to erroneous duplication and subsequent merging by the ROV, and noted that this data is still under review.

Discussion ensued relating to efforts to inform voters that they can request a new ballot if they receive the wrong one.

6 RESULT: RECEIVED

7. Consider recommendations relating to voter party preference issues. (ID# 99888)

Possible action:

a. Discuss recent Sacramento Bee article relating to unexpected changes to voter registrations when voters update their address with the Department of Motor Vehicles.

b. Discuss and approve a recommendation that the Office of the Registrar of Voters permit voters to query their current party registration online and update their party preference, if needed.
In response to an inquiry by Commissioner Chessin, Ms. Bushey stated that ROV is in the process of updating the online registration query to include party preference information. Mr. Moreles clarified that the updated query is expected to go live on January 17, 2020. He further noted that if a voter discovers they are registered with the wrong party preference, they are referred to go through the normal registration process that verifies information against DMV and other databases.

**7 RESULT: RECEIVED**

8. **Discuss possible collaboration with the City and County of San Francisco relating to an open source voting system, including the possible adoption of a resolution endorsing the concept of an open source voting system, and approve recommendations, if any. (ID# 100098)**

Taken out of order after Item No. 3.

One individual addressed the Commission.

In response to an inquiry by Commissioner Chessin, Ms. Bushey stated that if the system was State certified, ROV would consider implementing open source voting. She further noted that Los Angeles spent 8-10 years developing an open source voting system and spent approximately $15-20 million in Research and Development.

In response to an inquiry by Commissioner Chessin relating to whether ROV would support the concept of collaboration with San Francisco, Mr. Moreles clarified that it depends on the type of collaboration, that extensive staff time would require approval from County Administration, and that policy implications would require direction from the Board of Supervisors.

Commissioner Chessin stated that Christopher Jerdonek, Commissioner, Elections Commission of the City and County of San Francisco, informed him that if County of Santa Clara expressed interested in collaboration with San Francisco, a discussion to define collaborative efforts would be the next step.

Commissioner Lomio suggested that Commissioners seek the endorsement of a Member of the Board of Supervisors interested in spearheading the idea rather than make a recommendation to the ROV.

Discussion ensued relating to implementation cost and long term savings.

The Commission approved endorsing the concept of an open source voting system and to recommend to the Board of Supervisors that the County explore collaboration with the City and County of San Francisco relating to the development of an open source voting system.
8 RESULT:  APPROVED [4 TO 0]

A committee comprised of Board Policy Aides and the Office of the Clerk of the Board have developed a standard template for use by Boards and Commissions in completing their annual work plans. A significant change is that work plans will be based on a fiscal year rather than a calendar year. The new work plans are to be completed by each Board and Commission and approved at a regular Board or Commission meeting no later than April 1 of each year. The Clerk’s Office will then transmit the work plans to the appropriate Board Committee for review in May of each year and to the Board of Supervisors for approval in June.
